

Coding & Solution

Date	30 september 2026
Team ID	SWTID-2026-3750
Project Name	ComicCraftAI
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/santhosht7284-crypto/ComicCraftAI
Programming Language(s)	Python, JavaScript (for some UI)
Framework(s) Used	PyTorch, Diffusers, Hugging Face Hub, Flask
Key Features Implemented	● Integration with Stable Diffusion for high-quality panel generation ● Character-to-character appearance consistency algorithms ● Script-to-panel conversion via text prompt engineering ● Automated text bubble generation and placement
Pending / Incomplete Features	● Basic project management and multi-page support Automated colorization, complex scene interaction models
Setup / Run Instructions	Detailed step-by-step instructions (refer to 'SETUP.md' in repository)

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

All fundamental criteria are met. Error handling for major API calls is comprehensive, and documentation covers key classes. Suggest adding more unit tests for future feature scaling. Overall project structure is excellent.
